The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by international Gemological Institute (IG.I). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. maloys, master ador comparison stones, non-contract-optical instruments and/or processes as deemed appropriate by I.G.I. This Report includes advanced security features. A duy accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat
