The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by international Gemological Institute (IG.1). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). (G.1) may and utilize those techniques and equipment currently available to IG.1, including, without limitation, 10X megnification, corrected triplet louge, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sure¹⁹, Diamond View¹¹, Spectraph formeter an usuch other vanced security features. A duly accedited gemologitis or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat
