The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGLI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to IG.I. including, without limitation. 10X magnification, corrected triplet loupe, binocular microscope, master cotor companison stones, non-contact-optical measuring device, Diamond Sure <sup>14</sup>, Diamond View <sup>14</sup>, Spectraphotometer and such other vanced security fratures. A duly accredited genologist of jewelies cardotises and the respect to the importance of and interrelationship between cut, color, clarity and cardiveloth.
