The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Instituct (IGLI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGL employs and utilizes those techniques and equipment currently available to IGL, including, without limitation. DX magnification, corrections are considered as the production of the control of t

weight.
