The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.L.). A laboratory grown diamond is one that has essentially the same chemical, physi-(LGL). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). LGL employs and utilizes those techniques and equipment currently available to LGL, including, without iminitation, 10X magnification, correct displet loupe, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sure¹⁴, Diamond Viewi¹⁴, Spectraphotometer and such other instruments and/or processes as deemed appropriate by LGL. This Report includes adsenting the control of the control
