The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). IGI's laboratory grown diamond grading system is a scientific name, chemical, physical and optical property based system with the exception of the term "laboratory grown" (an artificial product) and "diamond" (which has the exception of the term "laboratory grown" man (a manufactured product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected 30X magnification, 50X magnification, 70X magnification, 100X magnification, measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advised security features. A duly accredited gemologist or jeweler can advise you with relevance the importance of and interrelationship between cut, color, clarity and carat weight.
