The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a natural diamond. IGI is a company owned by a natural diamond (as manufactured product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected triple beam, binocular microscope, color color comparison stones, non-contrast lighting, and other laboratory grown diamond testing equipment. IGI does not use such instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with relevance the importance of and interrelationship between cut, color, clarity and carat weight.
