The laboratory grown channered described in this Report (Report) has been graded treated, analyzed examined and/or inscribed by thematicishal General Capital (IGL). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation, 10x magnification, corrected the control of the contr
