The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI") using the same techniques and equipment as used to grade, test, analyze, examine and/or inscribe natural diamonds. IGI's grading and testing procedures are based on the same physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGI employs and utilizes these techniques and equipment to grade, test, analyze, examine and/or inscribe diamonds using the following equipment: triple loupe, binocular microscope, master color comparison stones, non-contact optical measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate. IGI's grading and testing procedures involve advanced security features. A duly accredited gemologist or jeweler can advise you with regard to the importance of and interrelationship between cut, color, clarity and carat weight.
