The laboratory growdiamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("IGI"). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man rather than nature. IGI's grading system includes the following techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact-optical spectrometer, ultraviolet fluorescence spectrometer, Fourier transform infrared instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE CONSULT THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE FOR THIS REPORT. INFORMATION REGARDING THESE LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGILABS.COM OR CALL 866-979-1618
